PROFESSIONAL SUMMARY

Builder-operator who designs the systems that make teams and processes work better. Architected a 900+ file AI operating system with 31 custom skills used daily for 4+ months across customer renewals, competitive intelligence, CRM automation, and pipeline enablement. Three years of progressive SaaS operations at Coding Temple produced verified outcomes: rebuilt customer success infrastructure supporting hundreds of accounts (20%+ touchpoint reduction), designed retention analytics surfacing at-risk customers 2 weeks earlier (12% placement improvement), scaled a pilot into a flagship enterprise product (70%+ employer partner reference rate), and automated 4-hour setup cycles to 15 minutes. Fifteen years of Michelin-starred kitchen leadership built the operational instincts that make systems thinking second nature: managing 20+ person teams, building repeatable processes under pressure, and translating chaos into consistent execution.

CORE COMPETENCIES

AI-Powered Workflow Design	Customer Lifecycle Management	Python / Node.js / React
Operational Infrastructure Buildout	Retention Analytics & Early Warning	API Integration & MCP Servers
Process Automation at Scale	Customer Renewal Methodology	CRM Systems (Attio, HubSpot, Salesforce)
Cross-Functional Program Management	Pipeline Intelligence & Competitive Research	Automation (Zapier, Make, Notion)
Curriculum Design & Training Systems	Stakeholder & Partner Management	Claude Code / AI Orchestration

PROFESSIONAL EXPERIENCE

Wonda VR | Chicago, IL (Remote) · Healthcare EdTech SaaS (VR-based medical-education simulation)

Solutions Engineer (Fractional)

Oct 2025 – Present

- Designed and deployed a 31-skill AI operating system (900+ files) integrating CRM, web scraping, workflow automation, and content generation. Production system used daily for 4+ months across all customer-facing work.
- Built a 6-stage customer renewal methodology producing 11 deliverables per account, from usage analysis and expansion opportunities through QBR presentations and proposal narratives.
- Audited CRM data health and built an automated ingestion agent that restored data integrity across the customer base.
- Created a competitive intelligence framework with structured research methodology and templated reporting; professional deliverables scored 9.5/10 against editorial standards.
- Identified a misdirected strategic initiative and helped redirect the approach based on market evidence.

Coding Temple | Chicago, IL · EdTech SaaS (full-stack engineering bootcamp & workforce-development platform)

Tech Residency Product Leader

Feb 2025 – Aug 2025

- Scaled a pilot into a flagship 8-week enterprise simulation immersing graduates in cross-functional teamwork and industry-standard workflows. 70%+ of employer partners cited the program as a key hiring differentiator.
- Designed the curriculum structure, experiential learning arc, and employer-partner pairings from scratch; built feedback loops and analytics tracking outcomes across cohorts.
- Engineered automated configuration reducing per-cohort project setup from 4 hours to 15 minutes with 100% specification compliance.

Customer Success Manager & Careers Lead

Jun 2024 – Feb 2025

- Rebuilt customer success infrastructure from scratch for hundreds of accounts: redesigned onboarding, built hiring-partner pipelines, implemented personalized coaching frameworks. Reduced advisor touchpoints 20%+ while achieving record engagement and placement.
- Built executive-facing dashboards monitoring placement velocity and cohort health, surfacing operational bottlenecks invisible in prior reporting.

Student Success Manager

Nov 2023 – Jun 2024

- Designed a retention analytics system surfacing at-risk customers 2 weeks earlier than previous methods; drove a 12% improvement in graduation and placement rates through data-driven interventions.
- Developed workflow automation (Zapier, Notion, Make) for onboarding, lifecycle tracking, and coaching; reduced operational overhead approximately 30% while scaling across concurrent cohorts.

Associate Instructor · Full Stack Web Developer

Oct 2022 – Nov 2023

- Delivered technical curriculum across full-stack engineering modules; recognized by the founder for teaching effectiveness, leading to expanded operational responsibilities. Ran 1-on-1 coaching and professional-development sessions.
- Built 3 production web applications (React + Flask/PostgreSQL) with API integrations and cloud hosting; contributed to curriculum and student-facing tooling.

Chicago Restaurants (Multiple) | Chicago, IL · Michelin-starred & fine-dining establishments

Chef & Culinary Operations Leader

2005 – 2020

- Managed 20+ person brigades through 15 years of high-pressure service at Michelin-starred standards. One of the highest-paid sous chefs in Chicago, with compensation driven by operational impact.
- Built systems for cost control, staff training, service consistency, and operational repeatability that sustained performance across staff turnover and volume swings. Translating chaos into consistent execution became the operating principle carried into tech.

Earlier | *Delivery First (Freelance Full Stack Developer, 2022) · Trading Company, CBOE area (Trading Floor Technology Specialist, 2002–2004)*

- Built web-application features in Python, Flask, SQL, and React (first professional development role post-certificate). Earlier, helped a small trading firm transition from floor-based to electronic trading, the first professional application of a Computer Science degree.

SELECTED PROJECTS

Sales Enablement Engine. 31-skill AI operating system (900+ files) for customer renewals, competitive intelligence, CRM automation, and sales enablement. Python, Node.js, Claude Code, MCP integrations (Attio, Bright Data, Puppeteer, Notion). Used daily for 4+ months.

Job Search Engine. 20-skill process-driven engine extracted from auditing 63 skills across 4 projects; built in 2 days via subagent-driven development. DOCX pipeline, target lifecycle, two-layer audit system.

On-Demand Curriculum Engine. Research-backed interactive walkthrough generator producing 3,000+ line HTML learning outputs with embedded visualizations and process-governance patterns.

Attio CRM Agent. Declarative ingestion agent for CRM data quality, with 40+ documentation files governing workspace health and automated maintenance.

Competitive Research & Benchmarking. Competitive-analysis framework (Bright Data scraping, HTML report templates, structured QA; deliverables scored 9.5/10) and a deployed salary-benchmarking research deliverable for workforce planning.

EDUCATION

Loyola University New Orleans · B.A. Computer Science

Coding Temple · Full-Stack Software Engineering Certificate · 2022

Le Cordon Bleu · A.A. Culinary Arts

TECHNICAL SKILLS

Python · Node.js · React · JavaScript · SQL · Flask · REST APIs · Claude Code · MCP Server Integrations · CRM Systems (Attio, HubSpot, Salesforce) · Zapier · Make · Notion · Git · HTML/CSS · Puppeteer · Bright Data · DOCX/HTML Generation Pipelines · Dashboard & Reporting Tools · AI Orchestration Architecture
